

CAREER OBJECTIVE

Recent Computer Science graduate skilled in data-driven problem-solving, with a strong ability to analyze complex data using Python and SQL to uncover insights. I excel at translating technical findings into clear business requirements and process improvements. I am eager to leverage this hybrid skill set to help a forward-thinking organization solve challenging problems and achieve its strategic goals.

EDUCATION

Bachelor of Science - Computer Science
Awadhesh Pratap Singh University Rewa (M.P)

2022 - 2025
CGPA - 8.3

SKILLS

- Technical Skills:** Python (Pandas, NumPy), SQL, MySQL, Generative AI (Gemini, Co-pilot)
- Analysis & Visualization:** Power BI, Tableau, Advanced Excel (Pivot Tables, XLOOKUP), Matplotlib
- BA & Process Tools:** Agile, Scrum, SDLC, PLC, Jira, Trello, draw.io, Canva
- Core Competencies:** Requirements Elicitation, Stakeholder Management, Process Modeling (UML, BPMN)

EXPERIENCE

Business Analyst Intern | New Talent Infotech Pvt. Ltd.

July 2025 - Oct 2025

Developed BRDs, FRSS, and User Stories from stakeholder requirements in an Agile/Scrum environment. Conducted market research using Excel to identify key trends and define website enhancement opportunities. Created UML/BPMN process models and managed project tasks using Jira. Presented data-driven recommendations to stakeholders, earning formal team recognition for detailed analysis.

Recruitment Analyst | Vastek Inc.

Sep 2022 - Dec 2022

Managed the full recruitment cycle by identifying, screening, and shortlisting qualified candidates from LinkedIn and job boards. Executed LinkedIn outreach campaigns while organizing all recruitment data using MS Excel and Google Sheets. Handled all communication with US-based stakeholders and candidates, including interview coordination, and collaborated effectively with the team via Microsoft Teams.

PROJECTS

E-commerce Recommendation Engine | [LINK](#)

- Planned & Analyzed:** Managed the full project lifecycle, identifying a core business problem (Low AOV) and authoring 11 strategic artifacts (BRD, As-Is/To-Be BPMN, UML, FRS, Agile User Stories, & RTM).
- Technical Execution:** Built the core recommendation logic by analyzing 500k+ real transactions (UCI dataset) using Python (Pandas for data cleaning & Mlxtend for Apriori algorithm).
- Data Visualization & Results:** Proved project ROI by simulating an A/B test and building a Tableau KPI dashboard; achieved a +6.29% lift in AOV (Goal: +5%) & +4.84% lift in Conversion Rate.

Diwali Retail Analytics | [LINK](#)

- Performed complete data cleaning and analysis using Python (Pandas), Excel (Pivot Tables, Pivot Charts), and SQL (using GROUP BY, ORDER BY) to identify key business insights.
- Developed and published an interactive Tableau dashboard to visualize top customer segments (Females 26-35), high-value states (UP, MH), and best-selling products.
